## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement filed 9-20-04 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because a legible copy of each cited foreign patent document has not been provided. It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609 ¶ C(1).

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1 through 4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 1 recites the limitation "said motor" in line 8. There is insufficient antecedent basis for this limitation in the claim.

4. Claim 3 recites the limitation "said motor" in line 9. There is insufficient antecedent basis for this limitation in the claim.

5. Claims 1 and 3 each recite two instances of the limitation of "a steering torque".

Are these two different steering torques or the same steering torque?

6. The remaining claims are indefinite by being dependant on an indefinite claim.

7. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

8. Claims 1 through 4 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The limitations "said assist motor is controlled by setting the determined steering wheel torque to said steering torque" and "setting the determined steering wheel torque determined by said steering wheel torque calculating means to said steering torque" are not supported by the in the specification. How is the steering wheel torque set to the steering torque? How does this control the assist motor? Earlier in the claims, the steering wheel torque is generated according to several values yet the above limitations contradict this.

***Allowable Subject Matter***

9. Claims 1 through 4 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 1<sup>st</sup> and 2nd paragraph, set forth in this Office action.

Art Unit: 3661

10. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not disclose a steering wheel torque is generated by using a steering torque generated by an output shaft of the transfer ratio variable mechanism, a motor torque generated by a motor of the transfer ratio variable mechanism, and a rotation angle of the motor.

**Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian J. Broadhead whose telephone number is 571-272-6957. The examiner can normally be reached on Monday through Friday.
